**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, 6-10 and 20, drawn to a Zhu-Yin or Pin-Yin input method for inputting a phonetic symbol string into a computer, consisting of a keypad, a R-1 refining control window panel, and a R-2 refining control panel, entered through a sequence of operations called Press-Touch-Release (PTR) operations, classified in class 345, subclass 171.
  - II. Claim 11, drawn to a cascade multi-window containing several over-lapped window pages, classified in class 345, subclass 641.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an input method allowing the user to input phonetic strings to output a Chinese character; invention II has separate utility such as providing a user interface such that a cascade of multiple windows is presented to the user, allowing a user to browse and select items from the windows. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Claims 12-19 are improper dependent claims. The dependency of claim 12 is unclear, therefore claims 12-19 are not included in the grouping of claims.
